

**NEW YORK  
CHIROPRACTIC  
COLLEGE**

## Subject Recruitment

*Footlevelers Biomechanics Lab is collecting gait data to establish a gender-and-age matched normative gait database using state-of-the-art equipment. This represents an important step towards assessment of atypical gait patterns due to various pathological conditions.*

We are looking for research subjects between the ages of 20-30 and 40-50. If you do not have a history of musculoskeletal or neurological disorders, you can be a part of our study. Each subject will participate a 2 hour testing session at the *Footlevelers Biomechanics Lab* in the Research Building.

At the end of the study you will be given a free gait analysis report.

To learn more about the study or to schedule an appointment, please call Anne Johnson at (315)568-3868.
